

## HG7D0S: PMI-ACP® Preparatory Course

Length: 3 days

Best suited for: professionals working on Agile teams or considering using Agile

### Why the PMI Agile Certified Practitioner (PMI-ACP®) Certification?

The ability to deal with complexity in several different ways, thriving on rapid change to move projects forward and the understanding of various agile ideas makes professionals sought after across small and large organizations alike. While there are many different certificates one can pursue, Project Management Institute's Agile Certified Practitioner is increasing rapidly in numbers.

PMI is best known for its Project Management Professional (PMP®) certificate, which is one of the most valuable certificates one could acquire as a project manager, so their recent entry into the agile space was both expected and welcome. And the stats? PMI-ACP® is their fastest growing certificate, making it a very exciting prospect for professionals aiming to show their competence and experience with the agile mindset.

The course will:

- Provide the theoretical background necessary for the exam
- Explain the tools and techniques backed with real-life examples to make the understanding easier
- Optionally with extra charge (99 USD/person): provide a question database with 480 questions (4 full tests) so that the participants can continue to prepare individually after the course

### PMI-ACP® Eligibility Requirements:

To be eligible for the PMI-ACP® credential, participants must meet certain educational and professional experience requirements, listed in the following table:

<b>Educational Background</b>	Secondary degree (high school diploma or global equivalent)
<b>General Project Experience*</b>	2,000 hours (12 months) working on project teams from the last 5 years
<b>Agile Project Experience</b>	1,500 hours (8 months) working on project teams using agile methodologies from the last 3 years. These hours are in addition to the 2,000 hours required in general project experience.
<b>Training in Agile Practices</b>	21 contact hours - must have been earned in agile practices

*\*PMP and/or PgMP certification holders will be accepted as fulfilling the general project experience requirements.*

## **PMI-ACP® certification curriculum and the exam**

The exam is based on the PMI-ACP® Examination Content Outline, a document developed by PMI® that details the theoretical knowledge required for the exam.

The exam questions cover seven domains identified by PMI®. The three-hour test consists of 120 multiple-choice questions that are designed to measure the student's comprehension of both the agile mindset and its tools.

Students are required by PMI® to have completed agile-specific training before applying for the exam – this course satisfies this requirement in full.

### **Course outline:**

DAY	DOMAIN	TOPIC
1	I.	Agile Principles and Mindset
1	II.	Value-driven Delivery
2	III.	Stakeholder Engagement
